

The screenshot shows a Mac desktop with two browser windows. The left window is a code editor showing the file `app.js` with the following content:

```

1 // navToggle.addEventListener('click') callback
2 // contains - checks classList for specific class
3 // add - add class
4 // remove - remove class
5 // toggle - toggles class
6
7 const navToggle = document.querySelector('.nav-toggle');
8 const links = document.querySelector('.links');
9
10 navToggle.addEventListener('click', () => {
11   // if(links.classList.contains('show-links')){
12   //   links.classList.remove('show-links');
13   // } else{
14   //   links.classList.add('show-links');
15   // }
16   links.classList.toggle('show-links');
17 })

```

The right window is a browser displaying the URL `https://tku365.sharepoint.com`. The page content includes the text "Coding Addict" and a navigation bar. The DevTools sidebar is open, showing the "Elements" tab with the "links" class selected. The CSS for the "links" class is defined as:

```

.links {
  height: 0;
  overflow: hidden;
  transition: var(--transition);
}

```

The screenshot shows a Mac desktop with two browser windows. The left window is a code editor showing the file `app.js` with the same content as the previous screenshot.

The right window is a browser displaying the URL `https://tku365.sharepoint.com`. The page content includes the text "Coding Addict" and a navigation bar. The DevTools sidebar is open, showing the "Elements" tab with the "links show-links" class selected. The CSS for the "show-links" class is defined as:

```

.show-links {
  height: 10rem;
}

```

The CSS for the ".links" class is also shown:

```

.links {
  height: 0;
  overflow: hidden;
  transition: var(--transition);
}

```
